SUMMARY

I aim to develop my career as a Networking Engineer. In the short term, I am seeking an internship opportunity where I can strengthen my knowledge of computer networks, gain hands-on experience with network infrastructure, and apply what I have learned to real-world environments. In the long term, I hope to contribute my skills and experience to designing, operating, and maintaining stable, secure, and efficient network systems for organizations.

EDUCATION

2023 – Present

Ho Chi Minh City University of Technology and Engineering
Major: Information Security

SKILLS

Network Fundamentals

Basic understanding of TCP/IP, OSI model, IP addressing, subnetting, routing, switching, VLAN, trunking, NAT, DHCP, DNS, ACL, and VPN technologies.

Routing and Switching

Hands-on classroom lab experience configuring routers and switches, including VLAN configuration, inter-VLAN routing, static routing, basic dynamic routing, trunking, access control lists, and basic network troubleshooting.

Firewall and Network Security

Hands-on lab experience with FortiGate and Cisco ASA for basic firewall configuration, security policies, NAT, VPN, and access control. Familiar with applying basic network security practices to protect internal network systems.

Web Application Firewall

Basic hands-on experience configuring FortiWeb in classroom lab environments, including web security policies, protection profiles, and basic configuration for securing web applications.

Network Monitoring and Analysis

Basic skills in monitoring and analyzing network traffic, logs, and abnormal behavior. Tools used: Wireshark, Wazuh, Splunk, and Elastic SIEM.

Programming and Scripting

Basic programming knowledge in Python, C/C++, C#, and Java; able to write simple scripts to support troubleshooting, automation, and data processing tasks.

PROJECTS

Enterprise Network Design

[Project Link](#)

Designed a scalable enterprise network for a headquarters and two branches with Data Center, DMZ, internal server farm, user VLANs, WAN connectivity, and network security zones. The design focused on high availability, performance, security, and future expansion.

Enterprise Network Configuration with Routing, Switching and VPN

[Project Link](#)

Built and configured a hierarchical enterprise network using Core, Distribution, and Access switches. Implemented VLAN, VTP, Trunking, EtherChannel, NAT, ACL, Port Security, DHCP Snooping, Firewall policies, RADIUS-based WiFi authentication, and IPSec Site-to-Site VPN between headquarters and branch networks.

Network Security Monitoring System

Researched, deployed, and compared network monitoring and security monitoring solutions including Zabbix, Cacti, PRTG, Nagios, and Wazuh. Built a lab environment for monitoring hosts, services, network devices, logs, dashboards, and alerting channels such as Email, Telegram, Discord, and voice call.

Web Application Firewall Deployment with FortiWeb

[Project Link](#)

Configured FortiWeb-100D as a Web Application Firewall to protect a vulnerable web application in a lab environment. Implemented protection policies against common web attacks such as SQL Injection, Cross-Site Scripting, CSRF, DoS/DDoS, malicious file upload, insecure HTTP headers, and unauthorized URL access.

ACTIVITIES

Teaching Assistant

Jan 2025 – Present

- Courses: Basic Networking, Operating Systems, Information Security.
- Supported lecturers in grading labs, reports, and examinations.
- Guided students in coursework, lab assignments, and technical questions.

Vice President, HCMUTE Information Security Club (HISC)

2025 – Present

- Actively participated in multiple CTF competitions.
- Focused on Cryptography and Forensics challenges.

HONORS & AWARDS

1st Place at Sinh Vien voi An Toan Thong Tin HCMUTE (HCMUTE CTFs) 2024 & 2025
